

Insurance Compensation Survey by PCI

Final Data Now Available for Purchase

The Insurance Compensation Survey by PCI, jointly conducted with Willis Towers Watson, is the only survey that provides benchmark compensation data exclusive to the insurance industry.

Final data is now available for purchase, allowing you to measure your company's compensation for both executive and non-executive positions against other insurance companies.

Results of the full survey cost \$1,550 for PCI members who did not submit data, a savings of \$300 if you purchased the executive and non-executive sections separately. Results are also available to non-members of PCI (see Fee Schedule).

For more information or to purchase results of the survey, email pci.surveys@pciaa.net.
