## FOR RELEASE ON RECEIPT

June 22, 2009

# PCI to Host Insurance and Auto Repair Session at NACE 2009

CHICAGO—The Property Casualty Insurers Association of America (PCI) will host a session focused on legislative and regulatory issues facing the insurance and auto repair industries at the International Autobody Congress & Exposition (NACE) this fall in Las Vegas.

PCI's Senior Director of Personal Lines Bob Passmore is the featured speaker. His interactive presentation will include a look at issues that arose in the 2009 legislative sessions, such as consumer repair options, estimating practices, aftermarket parts and shop licensing proposals, as well as a look ahead to 2010.

The session will be held Wednesday, November 4<sup>th</sup> at 10:30 a.m. NACE runs from November 4-7 at the Mandalay Bay Convention Center.

"I'm glad to have this opportunity to talk with repairers about issues that are important to both groups," said Passmore. "Insurers and auto body repair shops have a lot of common ground. They share the same customers and are held accountable for a quality repair and repair experience by the consumer."

NACE is designed for buyers and sellers within the collision repair community and offers networking opportunities and a marketplace to see new products, services, equipment and technology. The event is co-located with CARS, a trade and conference event for automotive service professionals.

Together, the events provide more than 80 educational and training sessions and have more than 400 diverse exhibitors.

To register for the event, visit [www.NACEexpo.com](http://www.NACEexpo.com).

PCI is composed of more than 1,000 member companies, representing the broadest cross-section of insurers of any national trade association. PCI members write over \$176 billion in annual premium, 35.9 percent of the nation's property casualty insurance. Member companies write 43.8 percent of the U.S. automobile insurance market, 29.6 percent of the homeowners market, 32.8 percent of the commercial property and liability market, and 38.4 percent of the private workers compensation market.
